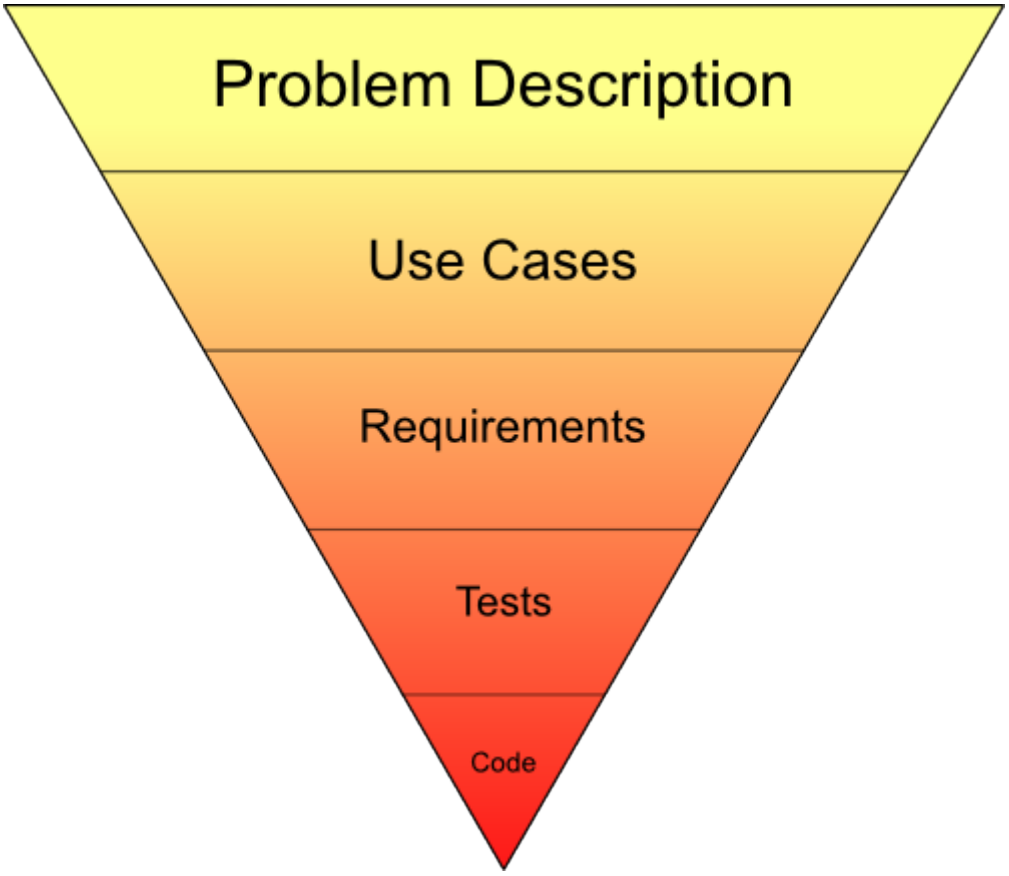
Levels of Software Specificity

By Roger Keays, 28 September 2008



Why would you start at the bottom of this chart? People seem to do it all the time:

hmmmm... that seems like a good idea. i can whip it up in no time. okay, i guess i should test this. hey it did something! but, hang on i didn't really want it to do that. if i just change this i can get it to do something else. ouch! now the first bit broke, but i might still be able use it to if these conditions hold true. that's still useful isn't it? it could happen right? wait. hang on, what the hell are we trying to do again?

Repeat ad nauseum.

About Roger Keays

Roger Keays is an artist, an engineer, and a student of life. He has no fixed addressand has leftfootprints on 40-something different countries around the world. Roger is addicted to surfing. His other interests are music, psychology, languages, the proper use of semicolons, and finding good food.
