

Best Android Mod For Samsung Spica i5700

By [Roger Keays](#), 3 December 2011

The developers over at the [Samdroid Forums](#) have made some pretty cool stuff for us Samsung Spica i5700 owners. The only problem is there is just too much stuff over on that forum and a lot of the builds are old and the kitchens for making custom mods are broken. So to save you the time, I'm going to tell you now which is the best mod of the Samsung i5700:

... drum roll please ...

SpicagenMod

It's a fork of CyanogenMod being developed by a young German guy called Lars Moelleken (he uses the nick "voku"). So far the only thing missing from this mod for me is a patch for the broken VOIP audio channels on the Spica. Hopefully we can get that fixed.

After you install the ROM you need to select the Honey theme from the SpicagenMod settings menu otherwise you won't be able to see the clock.

About Roger Keays

Roger Keays is an artist, an engineer, and a student of life. He has no fixed address and has left footprints on 40-something different countries around the world.

Roger is addicted to surfing. His other interests are music, psychology, languages, the proper use of semicolons, and finding good food.
