[Embed Code Plugin For FCKEditor](#)

By [Roger Keays](#), 17 November 2013

Here's a plugin I just whipped up for **FCKEditor** which makes it easy to add **embedded HTML code** such as YouTube and Vimeo videos.

To install, download the plugin below and unzip it in your plugin folder. Then add the following line to your fck_config.js:

```
FCKConfig.Plugins.Add('embed');
```

You will also need to add an 'Embed' entry to your toolbar array in fck_config.js.

[Download the FCKEditor Embed Plugin Now.](#)

One problem you should be aware of is that browsers now try to protect users from **XSS (Cross-Site Scripting)** injection, so if you send iframe tags in the embed code, they might get stripped out. To fix this problem, you need to ensure your server adds the following header:

```
X-XSS-Protection: 0
```

About Roger Keays

Roger Keays is an artist, an engineer, and a student of life. He has no fixed address and has left footprints on 40-something different countries around the world. Roger is addicted to surfing. His other interests are music, psychology, languages, the proper use of semicolons, and finding good food.
